

NautiCure

REWITEC[®]

Is your fleet ready for the next level of environment ratings?

With the industrial decarbonization at the center of many agenda's, shipping standards must rise to meet these sustainability goals. At NautiCure, we believe the fastest way to improve your GHG rating is by addressing the hidden enemy: friction!

As the exclusive partner of Rewitec GmbH for the marine sector, we provide a patented phyllosilicate technology that delivers measurable results:

- **Up to 9% Fuel Savings**
- **Extend Asset Life up to +17 Years**
- **Lower Emissions**

NautiCure has been invited to participate in the RightShip Zero Harm Innovation Program.

Join our exclusive webinar to learn how Rewitec can lead to a better vessel and environmental improvement.

Date: 2 April

Time: 12:00 GMT / 14:00 CET / 15:00 EET

Reserve your spot to receive the link: www.nauticure.com/webinar
